

Caleb Spain

Software Developer

Phone: 281-628-1079

Email: crspain@uh.edu

I am an experienced software developer who is looking to add long-term value to your company. Solving complex problems and learning new technologies is what I enjoy most.

Experience

Software Developer

May 2019 – Present

Imagine Fertility

- Utilized Google Maps API to build out a UI which allows patients to find and contact their preferred clinic.
- Created a 3rd party module which allows donor and 3rd party reproductive staff to manage the entire cycle without the need of multiple spreadsheets and sticky notes. (HTML, CSS, Bootstrap, JavaScript, jQuery, SQL, MariaDB, and PHP)
- Developed multiple features which sent out documents for patients to sign through the use of DocuSign's eSignature REST API.
- Began migrating the Imagine Patient Relationship Manager to a new technology stack. (Git/GitHub, Material-UI, React, Sequelize, Node.js, Express, and Google Cloud)

Web Developer

November 2018 – May 2019

Nan and Company Properties

- Created responsive and interactive web pages using multiple front-end technologies, such as HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Worked as part of the marketing team to create landing pages for retargeting ads, improve page performance/SEO, and decrease bounce rates.
- Automated repetitive tasks by creating spreadsheets which would populate the contents of an HTML document for emails and landing pages.
- Assisted with email campaigns by adding custom features to existing templates.

Education

University of Houston

2017 - Present

Bachelor of Science in Computer Science

Minor: Mathematics

San Jacinto College

2015 - 2017

Associate of Science in Mathematics
